DEMOCRACY WHEN THE PEOPLE ARE THINKING

REVITALIZING OUR POLITICS THROUGH PUBLIC DELIBERATION

By **James S. Fishkin**

30%
OFF!

- Combines political theory with specific case studies
- Helps dramatize what is at stake in re-invigorating democracy
- Clarifies specific reform possibilities

This book argues that ‘deliberative democracy’ is not utopian. It is a practical solution to many of democracy’s ills. It can supplement existing institutions with practical reforms. It can apply at all levels of government and for many different kinds of policy choices. This volume speaks to a recurring dilemma: listen to the people and get the angry voices of populism or rely on widely distrusted elites and get policies that seem out of touch with the public’s concerns. Instead, there are methods for getting a representative and thoughtful public voice that is really worth listening to. Democracy is under siege in most countries, where democratic institutions have low approval and face a resurgent threat from authoritarian regimes. Deliberative democracy can provide an antidote and can reinvigorate our democratic politics.

REVIEWS

“A provocative book that makes the case for the importance of deliberation as the foundation of real democracy. It challenges our beliefs about what is possible and outlines an institutional framework for creating a real deliberative democracy. It is an antidote to those who are pessimistic about the future of democracy. “

- **Norman M. Bradburn, Senior Fellow, NORC at the University of Chicago.**

“In this extraordinary book, *Fishkin* surveys the world wide efforts of governments and civil society groups to create real-world institutions enabling citizens to discuss and determine the fundamental issues confronting their societies. Based on this extraordinarily informed study, *Fishkin* shows how modern technology will permit even more dramatic expansions of deliberative democracy in the twenty-first century. At a time when pundits prophesy the fall of liberal democracy, *Fishkin's* demonstrations of these breakthroughs are of particular importance.

- **Bruce Ackerman, Sterling Professor of Law and Political Science, Yale University.**

This book may - and I hope will - change the face of democracy. Case upon case - from California, Texas, Mongolia, Uganda, China, Japan, Macau, Australia, the UK, and Europe - breaks new ground in the growing global movement to harness, for legitimacy and good outcomes, the deliberative intelligence of citizens drawn by lot.

- **Jane Mansbridge, Charles F. Adams Professor of Political Leadership and Democratic Values, Harvard Kennedy School.**
