<b>Q1-2. In terms of the choice of energy source and generation method, which of the four above aspects is most important to you – safety, stable supply, prevention of global warming, or cost? I will read the aspects so please rank the top three in order of importance from 1<sup>st</sup> to 3<sup>rd</sup>.</b>			
A. Which is the most important?			
1. Safety			
2. Stable supply			
3. Prevention of global warming			
4. Cost			
5. Don't know

<b>Q2. We will ask you about nuclear power generation in 2030, which is 18 years from now. Do you agree or disagree with the statements from A to C below? On a scale from 0 to 10, where 0 is strongly disagree, 10 is strongly agree, and 5 is exactly in the middle, please choose one for each question.</b>				
A. Do you agree with the statement "We should abandon all nuclear power plants as soon as possible, shutting down all plants by 2030"? On a scale from 0 to 10, where 0 is strongly disagree, 10 is strongly agree, and 5 is exactly in the middle, please choose one.
